New Engagement Group page created which includes agendas and notes from meetings.

Changes to the password-protected SMN page for LKSM. More pages added and now include sections on LQAF and Other Resources.

Find the spreadsheet of locally purchased e-resources collated in January on the password protected SMN page on the regional LibGuides site. The data collected is proving extremely valuable in terms of the work currently underway to reprocure national core content and to consider other possible purchasing arrangements for content for NHS libraries.

The resources page is being updated to include: News of the Awards Project
The Awards project is a do once and share cross-organisational collaborative initiative, which produces and manages a list of recognition awards appropriate to the health sector. The monthly Bulletin includes the current health awards which are open for entry which are tracked by the North West Awards Project Group. Library and knowledge service staff can adapt the resources for sharing across their organisation.

All SWIMS group meetings to be uploaded to the calendar

**#uklibchat: Celebrating diversity (Monday 6 August)** Our next Twitter chat is titled "Celebrating diversity: supporting clients and broadening the profession". Libraries are undisputedly important social meeting places where people from all backgrounds can come together with common purpose and share in activities and learning. The diversity of library staff and their users is important to helping all libraries innovate, thrive, and deliver meaningful and inclusive services to their communities. In this #uklibchat we will be exploring how we can leverage diversity to support our users better, which aspects and forms of diversity we have still to embrace and the challenges surrounding these, how we can attract an even more diverse range of people into libraries and librarianship, and more.
