South PAD Approved by NMC

The South PAD has been successfully approved in recent NMC validation events at Southampton, Exeter, Plymouth, Brighton and Portsmouth Universities. Two versions of the South PAD have been successfully approved, one containing grading in practice and one without grading in practice.

We’d like to thank colleagues at the above universities for being in the forefront of the NMC approval for the South PAD and associated OAR. This is a really key milestone in our project for a unified Practice Assessment Document for nursing students across the South of England.

Resources to Support South PAD implementation

The South PAD project team are pleased to announce we have made our support resources live on a libguides webpage which is open source. You can access template documents, PAD guide, contextual documents and much more.
